Function

Palette.ApplyPalette

```
Void Palette.ApplyPalette(Handle handle, Boolean usePaletteTimes)
```

API	http://api.avolites.com/10.1/Palette.ApplyPalette.html
description	Recall the palette on a handle - if the handle isn't a palette handle does nothing
namespace	Palette
parameter	handle (Handle) : the palette handle to apply
	usePaletteTimes (Boolean) : if set to true use palette times
return value	Void

Example in

ColourChaseChanger (V2):

```
  <step>Palette.ApplyPalette("Location=Colours,1,16", false)</step>
    // applies palette from Colours window page 1 button 16 in no fade time
```

For other handle references - by TitanID or user number - see handle

Also used in

- Programmer - Align Fixtures
- ColourChaseChanger (V2)
- Create Dummy Palettes
- Create a mixed colour palette (Snippet)
