parameter	Value [text/numeric] Knob [rotary knob] Display 8 bit [push button]
skins	Default , 8BitOption, InOutWithOveride

used in example

Plugin Backlinks: Nothing was found.

Manual

Outputs a user defined numeric value. The number value is stored internally as a 64-bit floating point number. It can also be passed through and 'over written' by the control knob. The user can select to display the value as normalised or in 8 bit (0..255).
