<b>licence level</b>	Anjuna
<b>ports</b>	In Val [control/numeric] Lock to Input [control/numeric] Out Val [control/numeric]
<b>parameter</b>	Value [text/numeric] Knob [rotary knob] Display 8 bit [push button]
<b>skins</b>	<b>Default</b> , 8BitOption, InOutWithOveride

## used in example

Plugin Backlinks: Nothing was found.

## Manual

Outputs a user defined numeric value. The number value is stored internally as a 64-bit floating point number. It can also be passed through and 'over written' by the control knob. The user can select to display the value as normalised or in 8 bit (0..255).
