Ai Modules

Null Render

section	GL
short description	render path without visual output/window
licence level	?
ports	Render In [Gl/Render]
parameter	./.
skins	./.

This module was introduced in Ai v10, and revoked in v10.3 because of some incompatibilities. It provides a render endpoint for modules which need to be hooked into the render path, without creating visual output.

used in example

- Simple Javascript Patch

Manual

not in the manual
