

Ai Modules

# Null Render

<b>section</b>	GL
<b>short description</b>	render path without visual output/window
<b>licence level</b>	?
<b>ports</b>	Render In [Gl/Render]
<b>parameter</b>	./.
<b>skins</b>	./.

This module was introduced in Ai v10, and revoked in v10.3 because of some incompatibilities. It provides a render endpoint for modules which need to be hooked into the render path, without creating visual output.

## used in example

- [Simple Javascript Patch](#)

## Manual

*not in the manual*
