# Null Render

|                          |  |
|--------------------------|--|
| <b>section</b>           | GL                                       |
| <b>short description</b> | render path without visual output/window |
| <b>licence level</b>     | ?  |
| <b>ports</b>             | Render In [Gl/Render]                    |
| <b>parameter</b>         | ./.                                      |
| <b>skins</b>             | ./.                                      |

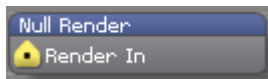

This module was introduced in Ai v10, and revoked in v10.3 because of some incompatibilities. It provides a render endpoint for modules which need to be hooked into the render path, without creating visual output.

## used in example

- [Simple Javascript Patch](#)

## Manual

*not in the manual*
