

Ai Modules

Patch IO

| | |
|--------------------------|--|
| section | Patch |
| short description | Special module which conducts ports to a parent patch/to the 'surface' of the patch. |
| licence level | Anjuna |
| ports | Ports are automatically created when patches are dropped onto the module, or onto the patch in the parent patch. |
| skins | ./. |

In order to expose parameters/controls, right-click those controls and select Add to Parent Panel.

used in example

Plugin Backlinks: Nothing was found.

Manual

Allows data to be passed between patches.
