Controlling Reaper from Titan on the same PC

(inspired by Oliver Waits, December 2019)

The idea is to control REaper (see Software List) in a similar way like Winamp, i.e. start, stop, pause etc.

Prerequisites

- 1. Titan PC-Suite, from v13 on (AvoKey required)
- 2. loopMIDI (see Software List, to route the MIDI signal from one program to another
- 3. Reaper (see Software List)
- 4. macros to send MMC commands, see MIDI Machine Control

5. at least one music track to play with

Make it run

1. loopMIDI

This needs to be started (usually: automatically when Windows starts). By default it provides a virtual MIDI port named loopMIDI Port:

Konfigurati					
Nam			Gesamtdaten	Durchsatz / Sek.	
loopN	IDI Port		0	0 Byte	
+-	Neuer Po	rt-Name: loopM	IIDI Port 1		

Last update: 2020/02/13 external:examples:reaper_mmc_on_same_pc https://avosupport.de/wiki/external/examples/reaper_mmc_on_same_pc?rev=1581593269 11:27

2. Titan PC Suite

Launch Titan PC Suite, load the MMC macros and copy the macros you plan to use on buttons as you like:

Macros								
17 MMC Play		18 MMC Pause	19 MMC Stop	20 MMC Goto Start				
			10	11	12			

3. Reaper

Launch Reaper and load a track.

In the Options menu select Preferences - this opens the preferences window. Find MIDI devices in the Audio section. This should list loopMIDI Port as MIDI input:

REAPER Preferences				Ŧ×		
Keyboard/Multitouch Project	*	MIDI hardware settings MIDI inputs to make available (selectable as track inputs and/or learnable or action-bindable):				
Track/Send Defaults		Device	Mode	ID		
Media Item Defaults Audio Device <u>MIDI Devices</u> Buffering Mute/Solo Playback	Ш	loopMIDI Port	Enabled+Control	0		
Seeking Recording Loop Recording Rendering		MIDI outputs to make available (selectable as trac	k outputs): Mode	Add joystick MIDI		
Appearance		loop MIDI Port	<disabled></disabled>	1		
Media Peaks/Waveforms Fades/Crossfades Track Control Panels Editing Behavior Envelope Display		Microsoft GS Wavetable Synth [use cautiously]		ō		
Automation Mouse		Restrict MIDI hardware output to one thread		Reset all MIDI devices		
Mouse Modifiers	Ŧ	Reset by: 📝 All-notes-off 📝 Pitch/sustain	Reset on: 🔽 Play	Stop/stopped seek		
Find			ОК	Cancel Apply		

Right-click on loopMIDI Port input and either enable input for control messages from the menu...

🕥 REAPER Preferences 🛛 🕂 💌						
Keyboard/Multitouch Project Track/Send Defaults	^	MIDI hardware settings MIDI inputs to make available (selectable as track inputs and/or learnable or action-bindable):				
Media Item Defaults Audio		Device Mode ID loopMIDI Port Enabled+Control 0				
Device MIDI Devices		Configure input				
Buffering Mute/Solo		Input ID Forget device				
Playback Seeking	Ш	Enable input				
Recording Loop Recording		Enable input for control messages ts): Add joystick MIDI				
Rendering		Device Mode ID				
Appearance Media		loop MIDI Port <disabled> 1 Microsoft GS Wavetable Synth [use cautiously] <disabled> 0</disabled></disabled>

Envelope Display	OK Cancel					
Automation						
Mouse	Restrict MIDI hardware output to one thread	l	Reset all MIDI devices			
Mouse Modifiers	Reset by: Il All-notes-off Il Pitch/sustain	Reset on: 📝 Play	Stop/stopped seek			
Find	Enable the MIDI Input devices you wish to use by right-clicking on the name and selecting Enable Input.	Device OK	Cancel Apply			

Confirm the settings with OK to close the preferences window.

4. Try it out

Essentially this should work staright away: in Titan, fire the macro MMC Play and Reaper should immediately start playing - but see below. This also works together with Reaper sending Timecode back into Titan, like described in Sending Timecode from Reaper to Titan on the same PC

Some caveats I found:

- it looks like Reaper wants to be started internally at first before listening to MMC. Thus, you at first need to hit Play in Reaper and stop this with MMC after this you can play/pause/stop from MMC as you like
- reaper seems to be ignorant to device IDs: when changing the macros to a designated device ID (by defaukt it sends to 7F which is All Devices) Reaper still listens and reacts, even with another ID selected in Reaper

5. How to debug

If things do not work as expected then there some tools which help finding the fault:

5.1 loopMIDI

loopMIDI shows the number of transmitted data. This number increases with every command. If this number does not increase then Titan doesn't send data.

Konfiguration Erweitert Über Meine Loopback MIDI-Ports Name loopMIDI Port	Samueten Durchsatz / Sek. 74 0 Byte
Name	
loopMIDI Port	
+ - Neuer Port-Name: loopMIDI P	Cort 1

AVOSUPPORT - https://avosupport.de/wiki/

5.2 USB Expert Console

Open the USB Expert Console. This must show loopMIDI Port 1 as connected panel (top-left). Select the MIDI tab top-right, click Watch MIDI, in the MIDI watcher window select MIDI Input an Raw MIDI. Now, as you send a command, it is shown in the MIDI watcher:

USB Expert Console 6.7.31.5						
File Tools Remote Help						
C Reset 💥 Suspend	ben Eventa			Timeox	de	
Connected Panels		Show / Hide Vectors	loopMIDI Port 1			
R GloopMDI Port 1		Time Stamp	Mid Watcher			_
	MEDE Watcher - loopMEDE Po	et 1				Watch MIDI
			•			
	FO 7F 7F 06 02 F7				Data 1	Data 2
