| <b>description:</b> | change Capture render settings via macro |
| <b>remarks:</b>     |  |

Remarks

- These macros combine several capture properties to achieve sensible settings
- ambient lighting and haze settings are controlled via separate macros
- I like to use the macro for low render settings in a startup cuelist as it helps PCs with less powerful graphics cards to open capture

## Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

- “Visualiser.Capture.AutomaticQuality”, false turns auto-quality off
- Visualiser.Capture.BloomAmount sets the Bloom Amount
- Visualiser.Capture.AtmosphereContrast sets Smoke Variation
- Visualiser.Capture.AtmosphereSpeed sets Smoke Speed
- Visualiser.Capture.SpillLighting turns Spill Lighting on or off
- Visualiser.Capture.CaptureRenderingSettings sets the actual Rendering Settings Detail

## How to use it

- make this macro available
