description:	Macros to change pages in both workspace and playback areas.
remarks:	used to directly access certain pages

More examples: Pages - Change Macros Page and Pages - Change All Playback Pages

change, handle, page, playback, group

The code below only is a snippet of the full macro. The full macro can be found here

adb_pagechanges.xml

and will have macros for page 1-60.

functions

- Handles.Playbacks.ChangePage
- Handles.Playbacks.PreviousPage
- Handles.Playbacks.NextPage
- Handles.StaticPlaybacks.ChangePage
- Handles.MobileWingAPlaybacks.ChangePage

affected properties

- windows._group_.currentpage

</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

- `ChangePage(x)` and `ActionScript.SetProperty.Integer("Windows.Playbacks.CurrentPage", 0)` change to a designated page in many windows
- `PreviousPage()` and `NextPage()` usually increment/decrement - but only if a window has a predefined number of pages, e.g. `Handles.Playbacks` and `Handles.MobileAWingPlaybacks` but not `Handles.StaticPlaybacks`

How to use it

1. make this macro available
