Example

Copy Icon (snippet only)

by:	kimwida, January 2019
published:	http://forum.avolites.com/viewtopic.php?f=20&t=5784#p21569
description:	copy a legend icon from another handle

copy, legend, icon

functions

- Handles.SetSourceHandleFromHandle
- Handles.SetIcon
- Math.Cast.ToInteger
- Handles.GetIconId
- Handles.ClearSelection

Code

```
  <step
pause="0.01">Handles.SetSourceHandleFromHandle(handle:"Location=Colours,1,3"
)</step>
  <step
pause="0.01">Handles.SetIcon(Math.Cast.ToInteger(Handles.GetIconId(handle:"L
ocation=Colours,1,1")))</step>
  <step pause="0.01">Handles.ClearSelection()</step>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

- `Handles.SetSourceHandleFromHandle` sets a particular handle as the source handle - here: the target for the copy operation
- `Handles.SetIcon` sets the icon of the target handle
- `Math.Cast.ToInteger` makes sure the icon id is of the Int type
- `Handles.GetIconId` gets the id of the icon which is currently used for another specified handle
- `Handles.ClearSelection` clears the selection so that no handle is highlighted as selected any more

How to use it

This is a snippet only - adapt and use it in your own macros.
