Example

Delete Group X

by:	Sebastian Beutel
published:	November 2018
description:	deletes a designated group

delete, group, handle

functions

- Handles.SetSourceHandleFromHandle
- Handles.ConfirmDelete

Code

DeleteGroup20.xml

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
  <macro id="SB.DeleteGroupUn20" name="Delete Group 20">
    <sequence>
<step>Handles.SetSourceHandleFromHandle("groupHandleUN=20")</step>
      <step>Handles.ConfirmDelete()</step>
    </sequence>
  </macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

- `Handles.SetSourceHandleFromHandle(“groupHandleUN=20”)` marks the group with usernumber 20 as sourceHandle for the next operation
- `Handles.ConfirmDelete()` deletes the previously selected handle (the group UN20)

How to use it

- make this macro available
- while it may be not that interesting to delete a group by individual macro, this is an example how items can be deleted in general - and maybe this is useful in another context
