| description: | Get Specific Cue Legend In A Cuelist |
| remarks: | How can I get second or third cue's legend in the cuelist?? I am trying to make a macro which show currently running cue's legend to the cuelist legend. For understanding. There is a cuelist which has "Colour" legend. It has 4 cues and each cue have "Red", "Green", "Blue" and "White" legend. What I want is when I fire the cuelist, cuelist legend change "Colour" to "Red". Then "Red" to "Green"... like this. |

get, cuelist, cue, legend

## functions

- ConnectedPlayback.Connect
- Handles.GetHandle
- Handles.SetSourceHandleFromHandle
- Playbacks.FillCueLegend
- Math.Cast.ToSingle
- Handles.SetLegend
- Handles.ClearSelection

## affected properties

- CueLists.LiveCueNumber
- Handles.PendingLegend

## Code

```
<step pause="0.01">ConnectedPlayback.Connect(Handles.GetHandle("PlaybackWindow",0,76))</step>
<step pause="0.01">Handles.SetSourceHandleFromHandle(Handles.GetHandle("PlaybackWindow",0,76))</step>
<step pause="0.01">Playbacks.FillCueLegend(
                Handles.GetHandle("PlaybackWindow",0,76),
                Math.Cast.ToSingle(CueLists.LiveCueNumber),
                "Handles.PendingLegend"
                )</step>
<step pause="0.01">Handles.SetLegend()</step>
<step pause="0.01">Handles.ClearSelection()</step>
```

# Explanation

- `ConnectedPlayback.Connect` connects to a specific playback
- `Handles.SetSourceHandleFromHandle` selects this playback to set its legend
- `Playbacks.FillCueLegend` gets a specific cue's legnd and feeds this into the property 'PendingLegend' to set it in the next step
- `Handles.SetLegend` sets the cuelist's legend to the current cue's legend

> If you didn't put cue legend of the cuelist, it will show default cuelist name.
>
> You could use "CueLists.LiveCueNumber +1", if you want to see next cue.

This is only a code snippet and not operational within itself. Listed here for documentation
