Example

# Setlist - next track

| | |
|---|---|
| **by:** | Alex del Bondio, April 2019 |
| **published:** | [here] |
| **description:** | fires the next unparked setlist track |
| **remarks:** | |

next, setlist, track

### functions

- SetList.NextTrack

## Code

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>

    <macro id="adb.Macros.nexttrack" name="Setlist Next Track">
        <sequence>
            <step>SetList.NextTrack()</step>
        </sequence>
    </macro>

</avolites.macros>
```

## Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

This simply fires the next setlist track.

## How to use it

1. create your show with all required setlists and tracks
2. make this macro available
3. fire the macros as needed. You might e.g. copy the macros to buttons in the macros workspace window and trigger them via MIDI.
