Code

[PrkRestoreProgrammer.xml](#)

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
<!-- Macros to emulate a second programmer - you can store the current
programmer,
    retrieve it again, and swop between the current and the stored
programmer -->
<!-- As Playbacks.StoreCue() always writes on the current page in the
referenced handle group,
    I chose the Macro window to store these special playbacks. -->
<!-- Sebastian Beutel, 27-06-2018 -->

<!-- Store programmer into a cue -->
<macro id="SB.Macros.Programmer.Park" name="SB Park Programmer">
  <description>Park Programmer to a playback</description>
  <sequence>
    <!-- store current programmer to playback #1000 -->
```

```
<step>Handles.SetSourceHandle("Macros", 1000)</step>
<step>Handles.ConfirmDelete()</step>
<step>ActionScript.SetProperty("Expert.RecordPlayback.RecordMode.ModeOnEnter", Playbacks.RecordMode)</step>
<step>ActionScript.SetProperty.Enum("Playbacks.RecordMode", "RecordCueModeProgrammer")</step>
<step>Playbacks.StoreCue("Macros", 1000, false)</step>
<step>Programmer.Editor.Clear(255, true, false, 0)</step>
<step>ActionScript.SetProperty("Playbacks.RecordMode", Expert.RecordPlayback.RecordMode.ModeOnEnter)</step>

<!-- set usernumber and legend -->
<step>Handles.SetSourceHandle("Macros", 1000)</step>
<step>ActionScript.SetProperty("Handles.CurrentUserNumber", userNumber:10000)</step>
<step>Handles.SetUserNumber()</step>
<step>ActionScript.SetProperty("Handles.PendingLegend", "Parked Programmer")</step>
<step>Handles.SetLegend()</step>
<step>Handles.ClearSelection()</step>
</sequence>
</macro>

<!-- Retrieve programmer from a cue -->
<macro id="SB.Macros.Programmer.Restore" name="SB Restore Programmer">
  <description>Restore Programmer from a playback</description>
  <sequence>
    <step>Programmer.Editor.Clear(255, true, false, 0)</step>
    <step>Include.SelectPlayback("Macros", 1000)</step>
  </sequence>
</macro>

<!-- Swop programmer with previously parked programmer -->

  <step>ActionScript.SetProperty.Enum("Playbacks.RecordMode", "RecordCueModeProgrammer")</step>
  <step>Playbacks.StoreCue("Macros", 1001, false)</step>
  <step>ActionScript.SetProperty("Playbacks.RecordMode", Expert.RecordPlayback.RecordMode.ModeOnEnter)</step>

  <!-- load previous programmer from playback #1000 -->
```

```
<step>Programmer.Editor.Clear(255, true, false, 0)</step>
<step>Include.SelectPlayback("Macros", 1000)</step>

<!-- delete playback #1000, move playback #1001 to #1000 -->
<step>Handles.SetSourceHandle("Macros", 1000)</step>
<step>Handles.ConfirmDelete()</step>
<step>Handles.SetSourceHandle("Macros", 1001)</step>
<step>ActionScript.SetProperty.Enum("Handles.OperationMode",
"move")</step>
<step>Handles.CopyDestination("Macros", 1000)</step>
<step>Handles.ClearSelection()</step>

<!-- set usernumber and legend -->
<step>Handles.SetSourceHandle("Macros", 1000)</step>
<step>ActionScript.SetProperty("Handles.CurrentUserNumber",
userNumber:10000)</step>
<step>Handles.SetUserNumber()</step>
<step>ActionScript.SetProperty("Handles.PendingLegend", "Parked
Programmer")</step>
<step>Handles.SetLegend()</step>
<step>Handles.ClearSelection()</step>

</sequence>
</macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

tbd

How to use it

1. [make this macro available](#)
