Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

Each macro gets the currently selected fixtures and puts these handles in the menu property "Windows.PatchView.Handles".

All fixtures in this property are then pan-inverted resp. pan-univerted.

How to use it

- [make this macro available](#)
- When needed, select some fixtures and apply this macro in order to invert pan for these fixtures.
