Toggle Timecode On/Off for particular playback

by:	Gregory Haynes, May 2016
published:	http://forum.avolites.com/viewtopic.php?f=20&t=4517
description:	Toggle whether the cue list on handle 1 of the current page is enabled for timecode.
remarks:	The original idea was to toggle a cuelist which is identified by its legend - but that's not possible. Greg writes '*I don't think there is a way to do this at the moment. I found a way of toggling a playback based on its location but it uses the current page, you could use the Playbacks window instead (which would be "PlaybackWindow").*'

functions

- Handles.SetSourceHandle
- Playbacks.Timecode.ToggleEnabled.Handle
- Handles.SetSourceHandleFromHandle

Code

togglePbTimecode.xml

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
  <macro id="UserMacro.TogglePlaybackTimecode">
    <name>Toggle Timecode Enabled</name>
    <description>Toggle whether the cue list on handle 1 of the current
page is enabled for timecode.</description>
    <sequence>
      <step>Handles.SetSourceHandle("Playbacks", 0)</step>
<step>Playbacks.Timecode.ToggleEnabled.Handle(Handles.SourceHandle)</st
ep>
      <step>Handles.SetSourceHandleFromHandle(null)</step>
    </sequence>
  </macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

tbd

How to use it

1. make this macro available
