

Example

Toggle Timecode On/Off for particular playback

by:	Gregory Haynes, May 2016
published:	http://forum.avolites.com/viewtopic.php?f=20&t=4517
description:	Toggle whether the cue list on handle 1 of the current page is enabled for timecode.
remarks:	The original idea was to toggle a cuelist which is identified by its legend - but that's not possible. Greg writes ' <i>I don't think there is a way to do this at the moment. I found a way of toggling a playback based on its location but it uses the current page, you could use the Playbacks window instead (which would be "PlaybackWindow").</i> '

functions

- Handles.SetSourceHandle
- Playbacks.Timecode.ToggleEnabled.Handle
- Handles.SetSourceHandleFromHandle

Code

[togglePbTimecode.xml](#)

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
    <macro id="UserMacro.TogglePlaybackTimecode">
        <name>Toggle Timecode Enabled</name>
        <description>Toggle whether the cue list on handle 1 of the current page is enabled for timecode.</description>
        <sequence>
            <step>Handles.SetSourceHandle("Playbacks", 0)</step>
            <step>Playbacks.Timecode.ToggleEnabled.Handle(Handles.SourceHandle)</step>
            <step>Handles.SetSourceHandleFromHandle(null)</step>
        </sequence>
    </macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to [Formats and syntax](#)

- Handles.SetSourceHandle("Playbacks", 0) makes the playback 1 the source handle

- `Playbacks.Timecode.ToggleEnabled.Handle(Handles.SourceHandle)` toggles the `Timecode.Enabled` setting of this handle - this is the 'Connected Cuelists' toggle button in the Timecode menu
- `Handles.SetSourceHandleFromHandle(null)` empties the source handle property.

How to use it

- [Make this macro available-](#)
- create a cuelist on playback 1
- open the [Timecode] menu
- go to [Connected Cue Lists] - the button [Cue List Playbacks[1]] is inactive
- <Exit> (the macro doesn't run as long as we are in this menu)
- fire the macro
- go to [Connected Cue Lists] - the button [Cue List Playbacks[1]] is now active
