Example

Toggle Timecode On/Off for particular playback

by:	Gregory Haynes, May 2016
published:	http://forum.avolites.com/viewtopic.php?f=20&t=4517
description:	Toggle whether the cue list on handle 1 of the current page is enabled for timecode.
remarks:	The original idea was to toggle a cuelist which is identified by its legend - but that's not possible. Greg writes '*I don't think there is a way to do this at the moment. I found a way of toggling a playback based on its location but it uses the current page, you could use the Playbacks window instead (which would be "PlaybackWindow").*'

[, handle, timecode, toggle, source,]

functions

- Handles.SetSourceHandle
- Playbacks.Timecode.ToggleEnabled.Handle
- Handles.SetSourceHandleFromHandle

Code

togglePbTimecode.xml

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
  <macro id="UserMacro.TogglePlaybackTimecode">
    <name>Toggle Timecode Enabled</name>
    <description>Toggle whether the cue list on handle 1 of the current
page is enabled for timecode.</description>
    <sequence>
      <step>Handles.SetSourceHandle("Playbacks", 0)</step>
<step>Playbacks.Timecode.ToggleEnabled.Handle(Handles.SourceHandle)</st
ep>
      <step>Handles.SetSourceHandleFromHandle(null)</step>
    </sequence>
  </macro>
</avolites.macros>
```

Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to Formats and syntax

- `Handles.SetSourceHandle("Playbacks", 0)` makes the playback 1 the source handle
- `Playbacks.Timecode.ToggleEnabled.Handle(Handles.SourceHandle)` toggles the Timecode.Enabled setting of this handle - this is the 'Connected Cuelists' toggle button in the Timecode menu
- `Handles.SetSourceHandleFromHandle(null)` empties the source handle property.

How to use it

- Make this macro available-
- create a cuelist on playback 1
- open the `[Timecode]` menu
- go to `[Connected Cue Lists]` - the button `[Cue List Playbacks[1]]` is inactive
- <Exit> (the macro doesn't run as long as we are in this menu)
- fire the macro
- go to `[Connected Cue Lists]` - the button `[Cue List Playbacks[1]]` is now active
