

Example

# Set Autoload to Go on Target on a specific list

<b>by:</b>	Sebastian Beutel, March 2025
<b>published:</b>	here
<b>description:</b>	Create an autoload on the selected cuelist cue, pointing to a specific cuelist, with 'Press Go on Target'
<b>remarks:</b>	idea by Pontus Wallin in <a href="#">Facebook</a>

**It seems that currently (Titan 17/Titan 18) Autoloads with Go on Target release the target if not use in subsequent cues. This has been reported and will be fixed. Consider recording and using a macro instead (connect to other cuelist and hit Go, or press the other cuelist'S go button).**

[Cuelist](#), [Autoload](#), [GoOnTarget](#)

## functions

- [Playbacks.Editor.SelectCueFromViewing](#)
- [Playbacks.Editor.Autoload.SetPlaybackAutoload](#)
- [Menu.ExitRootOrLatched](#)

## Code

[SetAutoload.xml](#)

```
<?xml version="1.0" encoding="utf-8"?>
<avolites.macros>
  <macro id="Wiki.Macros.SetAutoload.CL2Go" name="Set Autoload to CL2
Go">
  <sequence>
    <step>Playbacks.Editor.SelectCueFromViewing()</step>
  <step>Playbacks.Editor.Autoload.SetPlaybackAutoload("cueListHandleUN=2"
, 2, 0)</step>
  <step>Menu.ExitRootOrLatched()</step>
  </sequence>
</macro>
</avolites.macros>
```

## Explanation

This explains the functional steps within the sequence. For all the other XML details please refer to

## Formats and syntax

tbd

## How to use it

1. [make this macro available](#)

tbd
