

Function

Attribute.Mask.IncludeAll

```
Void Attribute.Mask.IncludeAll(String maskId)
```

| | |
|---------------------|--|
| API | http://api.avolites.com/11.0/Attribute.Mask.IncludeAll.html |
| description | Set a mask to include all. |
| namespace | Attribute |
| parameter | maskId (String) : Id of the mask Possible values: Record, TempRelease, Update, Patch, Clear, EditTimes, Include, Locate, Align, OnOffPlayback |
| return value | Void |

Example in

[PaletteChaseChanger \(V3\)](#):

Maybe this is faulty as there is no such attribute mask.

```
<step>Attribute.Mask.IncludeAll("Palette")</step>
```

Also used in

- [PaletteChaseChanger \(V3\)](#)
- [Function list](#)
