

Function

Attribute.Mask.SetMask

```
Void Attribute.Mask.SetMask(String maskId, String maskValue)
```

API	http://api.avolites.com/11.0/Attribute.Mask.SetMask.html
description	Set a mask to a textual value.
namespace	Attribute.Mask
parameter	maskId (String) : Id of the mask. maskValue (String) : "IPGBES" string to set to.
return value	Void

This is useful for switching entire attribute groups on/off. See example below.

Example in

[Off/On Attribute \(snippets\)](#):

```
Attribute.Mask.SetMask("OnOff", "IP")
```

Also used in

- [Off/On Attribute \(snippets\)](#)
