

Function

Handles.ConfirmDelete

Void Handles.ConfirmDelete()

API	http://api.avolites.com/11.0/Handles.ConfirmDelete.html
description	Confirms the and actions delete operation, no questions asked
Namespaces	Handles
parameter	no parameters - the handle referenced as sourceHandle will be deleted
return value	(Void)

In order to delete workspaces the property [Handles.AllowEditWorkspaces](#) needs to be set, see the gixen examples.

Example in

[Create Workspaces](#):

```
<step
pause="0.001">ActionScript.SetProperty.Boolean("Handles.AllowEditWorkspaces"
, true)</step>
<step
pause="0.001">Handles.SetSourceHandleFromHandle("workspaceHandleUN=1")</step
>
<step pause="0.001">Handles.ConfirmDelete()</step>
<step
pause="0.001">ActionScript.SetProperty.Boolean("Handles.AllowEditWorkspaces"
, false)</step>
```

Here the necessary steps are listed:

- workspace handles are made editable
- a particular workspace is selected as source handle
- this very workspace is deleted
- workspace handles are edit-locked again

Also used in

- [Create Workspaces](#)
- [Delete Group X](#)
- [Delete Playback](#)
- [Delete Workspace X](#)
- [Store cues with current page names as legends](#)
- [Programmer - Park/Restore/Swop](#)
- [Function list](#)

- [Handles.ConfirmRelease](#)
