Function

# Handles.GetTitanIdFromHandle

```
Int32 Handles.GetTitanIdFromHandle(Handle handle)
```

| | |
|---|---|
| **API** | https://api.avolites.com/16.0/api/Handles.GetTitanIdFromHandle.html |
| **description** | Gets the titan id from a handle. |
| **namespace** | Handles |
| **parameter** | handle ( Handle ) : The handle to get the titanId from. |
| **return value** | Int32 |

This one is useful for functions which do require a titanId while you rather want to pass e.g. a usernumber.

#### Example in

Timeline: Import Markers:

```
Handles.GetTitanIdFromHandle("timelineHandleUN=1")
```

#### Also used in

- Timeline: Import Markers
- Timelines.ImportMarkersFromString
