

Function

Handles.GetTitanIdFromHandle

```
Int32 Handles.GetTitanIdFromHandle(Handle handle)
```

API	https://api.avolites.com/16.0/api/Handles.GetTitanIdFromHandle.html
description	Gets the titan id from a handle.
namespace	Handles
parameter	handle (Handle) : The handle to get the titanId from.
return value	Int32

This one is useful for functions which do require a titanId while you rather want to pass e.g. a usernumber.

Example in

[Timeline: Import Markers:](#)

```
Handles.GetTitanIdFromHandle("timelineHandleUN=1")
```

Also used in

- [Timeline: Import Markers](#)
- [Timelines.ImportMarkersFromString](#)
