Handles.Macros.NextPage

ASSUMPTION

> This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

```
Void Handles.Macros.NextPage()
```

API	no
description	toggles the Macros buttons to the next page
Namespaces	Handles.Macros
parameter	
return value	(Void)

This function does not fully work as Avolites never intended these buttons to be paged. Handles.Macros.NextPage()) doesn't increment, but always goes to page 1.

Example in

changemacrospage:

```
<macro id="Avolites.Macros.NextMacrosPage" name="Static Macros Page +1">
   <description>Goes to the next macros page.</description>
   <sequence>
     <step>Handles.Macros.NextPage()</step>
   </sequence>
 </macro>
```

Also used in

- Pages - Change Macros Page
- Function list
