

Function

# Handles.Macros.PreviousPage

## ASSUMPTION

This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

```
Void Handles.Macros.PreviousPage()
```

<b>API</b>	no
<b>description</b>	toggles the Macros buttons to the previous page
<b>Namespaces</b>	<a href="#">Handles.Macros</a>
<b>parameter</b>	
<b>return value</b>	<a href="#">(Void)</a>

**This function does not fully work as Avolites never intended these buttons to be paged. Handles.Macros.PreviousPage() ) decrements as expected - but you can go down to page 0 which probably isn't intended.**

## Example in

[Pages - Change Macros Page:](#)

```
<macro id="Avolites.Macros.PreviousMacrosPage" name="Static Macros Page -1">
  <description>Goes to the previous macros page.</description>
  <sequence>
    <step>Handles.Macros.PreviousPage()</step>
  </sequence>
</macro>
```

## Also used in
