

Function

Handles.Playbacks.PreviousPage

ASSUMPTION

This function is not documented and simply found by trying. Hence, this entire documentation is assumed.

```
Void Handles.Playbacks.PreviousPage()
```

| | |
|---------------------|--|
| API | no |
| description | toggles the playbacks to the previous page |
| Namespaces | Handles.Playbacks |
| parameter | |
| return value | (Void) |

This function does not fully work as Avolites never intended these buttons to be paged. `Handles.Playbacks.PreviousPage()` decrements as expected - but you can go down to page 0 which probably isn't intended.

Example in

[Pages - Change Pages:](#)

```
<macro id="adb.Macros.PreviousPagePB" name="adb Change Page PB -1">
  <sequence>
    <step>Handles.Playbacks.PreviousPage()</step>
  </sequence>
</macro>
```

Also used in

- [Pages - Change Pages](#)
- [Function list](#)
