

Function

Handles.SetLegend

Void Handles.SetLegend()

API	http://api.avolites.com/11.0/Handles.SetLegend.html
description	Set all the source handles to the pending legend.
namespace	Handles
parameter	no direct parameter. Implicitly this works with Handles.PendingLegend and with Handles.SourceHandle
return value	Void

This works on **all** source handles at once.

Example in

[Legend - Set a playback's legend:](#)

```
<step>Handles.SetLegend()</step>
```

Also used in

- [Chase - Change a chaser's XFade](#)
- [Dummy speed as condition](#)
- [Legend - Get a cuelist cue's legend](#)
- [Programmer - Park/Restore/Swap](#)
- [Quick-Create groups](#)
- [Chase - Set chase speed](#)
- [Legend - Set a playback's legend](#)
- [Function list](#)
