

## Function

# Handles.SetSourceHandleFromHandle

`Void Handles.SetSourceHandleFromHandle(Handle handle)`

<b>API</b>	<a href="http://api.avolites.com/10.1/Handles.SetSourceHandleFromHandle.html">http://api.avolites.com/10.1/Handles.SetSourceHandleFromHandle.html</a>
<b>description</b>	Sets the source handle to be a supplied handle
<b>namespace</b>	Handles
<b>parameter</b>	handle ( <a href="#">Handle</a> ) : the handle which is meant to be the source handle
<b>return value</b>	<a href="#">Void</a>
<b>affects</b>	Handles.SourceHandle

Unlike [Handles.SetSourceHandle](#) which always refers to the current page, `Handles.SetSourceHandleFromHandle(Handles.GetHandle() )` allows to set a handle on any page as source handle, see [Delete Playback](#).

## Example in

[Timecode - Toggle On/Off for particular playback](#):

```
<step>Handles.SetSourceHandleFromHandle(null)</step>
```

This makes the Handles.SourceHandle property void (see [Null](#) for an explanation of null).

## Also used in

- [Chase - Change a chaser's XFade](#)
- [Copy Icon \(snippet only\)](#)
- [Macro - Copy Macro by MacroId](#)
- [Create Workspaces](#)
- [Cuelist - Set Option FireFirstCue](#)
- [Delete Group X](#)
- [Delete Playback](#)
- [Dummy speed as condition](#)
- [Legend - Get a cuelist cue's legend](#)
- [Change Playback Timings Grid](#)
- [Move \(Copy\) Handle](#)
- [Store cues with current page names as legends](#)
- [PaletteChaseChanger \(V3\)](#)
- [Timecode - Toggle On/Off for particular playback](#)
- [Chase - Set chase speed](#)
- [Set a Handle's Halo](#)
- [Legend - Set a playback's legend](#)
- [Function list](#)
- [Handles.SetSourceHandle](#)
