Function

Menu.PushOrReloadMenu

```
Void Menu.PushOrReloadMenu(String newMenuId)
```

API	http://api.avolites.com/11.0/Menu.PushOrReloadMenu.html
description	Push a new menu onto the top of the stack if it's not already there If it is, just reload it.
namespace	Menu
parameter	newMenuId (String) : Id of the menu to add. There are many menus in Titan. One example is the generic error menu - its id is `Error.Generic`.
return value	Void

There might be various display items attached to each menu. E.g. the menu `Error.Generic` shows a message in the prompt, the contents being taken from Menu.ErrorMessage.

Example in

Show a message prompt:

```
<step>Menu.PushOrReloadMenu("Error.Generic")</step>
```

Also used in

- Show a message prompt
- Menu.ErrorReport
