

Function

Menu.PushOrReloadMenu

Void Menu.PushOrReloadMenu(**String** newMenuItem)

API	http://api.avolites.com/11.0/Menu.PushOrReloadMenu.html
description	Push a new menu onto the top of the stack if it's not already there If it is, just reload it.
namespace	Menu
parameter	newMenuItem (String) : Id of the menu to add. There are many menus in Titan. One example is the generic error menu - its id is Error.Generic.
return value	Void

There might be various display items attached to each menu. E.g. the menu Error.Generic shows a message in the prompt, the contents being taken from [Menu.ErrorMessage](#).

Example in

Show a message prompt:

```
<step>Menu.PushOrReloadMenu("Error.Generic")</step>
```

Also used in

- [Show a message prompt](#)
- [Menu.ErrorReport](#)
