

Function

# MergeCurrentPalette

```
Void Palette.MergeCurrentPalette()
```

|                     |   |
|---------------------|---|
| <b>API</b>          | <a href="https://api.avolites.com/12.0/Palette.MergeCurrentPalette.html">https://api.avolites.com/12.0/Palette.MergeCurrentPalette.html</a> |
| <b>description</b>  | Merge the current selection with the current palette  |
| <b>namespace</b>    | Palette   |
| <b>parameter</b>    | none  |
| <b>return value</b> | <b>Void</b>   |

Example in

[ColourChaseChanger \(V2\)](#):

(see explanation there - use this function instead of [Palette.StoreCurrentPaletteReplace](#) if you want to merge some parts into a palette)

```
<step pause="0.01">Palette.MergeCurrentPalette()</step>
```

Also used in

- [ColourChaseChanger \(V2\)](#)
- [Palette.StoreCurrentPaletteReplace](#)
