

Function

# Programmer.Editor.Clear

```
Void Programmer.Editor.Clear(AcwRecordMask mask, Boolean presets, Boolean clearAllProgrammers, Single fadeTime)
```

<b>API</b>	<a href="http://api.avolites.com/10.1/Programmer.Editor.Clear.html">http://api.avolites.com/10.1/Programmer.Editor.Clear.html</a>
<b>description</b>	Clears the editor and removes all values from the programmer. Also clears any fixture selections.
<b>namespace</b>	<a href="#">Programmer.Editor</a>
<b>parameter</b>	mask ( <a href="#">AcwRecordMask</a> ) : A mask of which attribute groups to clear.
	presets ( <a href="#">Boolean</a> ) : if set to true clear preset fader levels. This is only of interest in the Pearl Expert when patching fixtures onto the fader handles.
	clearAllProgrammers ( <a href="#">Boolean</a> ) : if set to true clear all programmers.
	fadeTime ( <a href="#">Single</a> ) : The time to use when clearing HTP channels.
<b>return value</b>	<a href="#">Void</a>

## Example in

Clear Colour:

```
<step>Programmer.Editor.Clear(4, true, false, 0)</step>
```

This clears

- the colour attribute
- also from presets
- only from the current programmer (the false - this leaves e.g. a remote untouched)
- in 0 seconds.

## Also used in
