

Function

Programmer.Editor.Fixtures.OnOffFixtureControls

```
Void Programmer.Editor.Fixtures.OnOffFixtureControls(Boolean on)
```

API	http://api.avolites.com/11.0/Programmer.Editor.Fixtures.OnOffFixtureControls.html
description	Switches ON or OFF all controls in the selected fixtures which are part of the OnOff mask.
namespace	Programmer.Editor.Fixtures
parameter	on (Boolean) : if set to true [on].
return value	Void

In order to make this work fixtures need to be selected and the OnOff mask must be set.

Example in

[Off/On Attribute \(snippets\)](#):

```
Group.RecallGroup(userNumber:1)  
Attribute.Mask.SetMask("OnOff", "IP")  
Programmer.Editor.Fixtures.OnOffFixtureControls(false)
```

Also used in

- [Off/On Attribute \(snippets\)](#)
