

Function

Timecode.Context.Play

Void Timecode.Context.Play()

API	http://api.avolites.com/11.0/Timecode.Context.Play.html
description	Starts the timecode timer in Titan.
namespace	Timecode.Context
parameter	none
return value	Void

Titan v11 introduced four separate timecode sources. Subsequently, there are now functions like Timecode.TimecodeOne.Play, Timecode.TimecodeTwo.Play etc. Timecode.Context.Play has the same effect like Timecode.TimecodeOne.Play and is believed to also work in pre v11 versions which had only one global Timecode source.

Example in

[Timecode - Start/Stop:](#)

```
<step>Timecode.Context.Play()</step>
```

Also used in

- [Timecode - Start/Stop](#)
