Function

Triggers.SetPendingTargetAction

```
Void Triggers.SetPendingTargetAction(String actionId)
```

API	http://api.avolites.com/11.0/Triggers.SetPendingTargetAction.html
description	Sets the pending handle target action.
namespace	Triggers
parameter	actionId(String) : The id (name) of the action to be triggered.
return value	Void

This works in conjunction with Triggers.SetPendingTargetHandle and inherently sets Triggers.PendingTriggerTarget

ASSUMPTION Possible action IDs:

actionId	function
Select	Select
Level	Set Level
FireAt	Fire At Level
ReFireAt	Re-Fire At Level
PresetLevel	Set Preset Level
ProgrammerLevel	Set Programmer Level
