

Location

# Playbacks

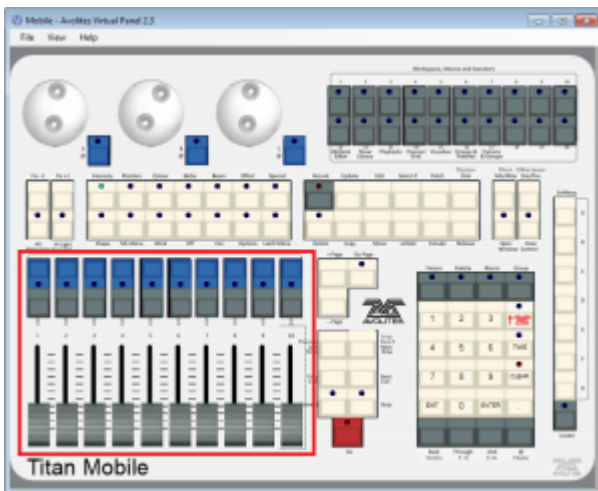

The main playback handles. In earlier version, they could also be identified by [RollerA](#) and [RollerB](#).

There are 60 playback pages predefined. More playbacks can be stored in the [PlaybackWindow](#), [StaticPlaybacks](#) - and on larger consoles or with optional wings, in groups like the [MobileWingAPlaybacks](#).

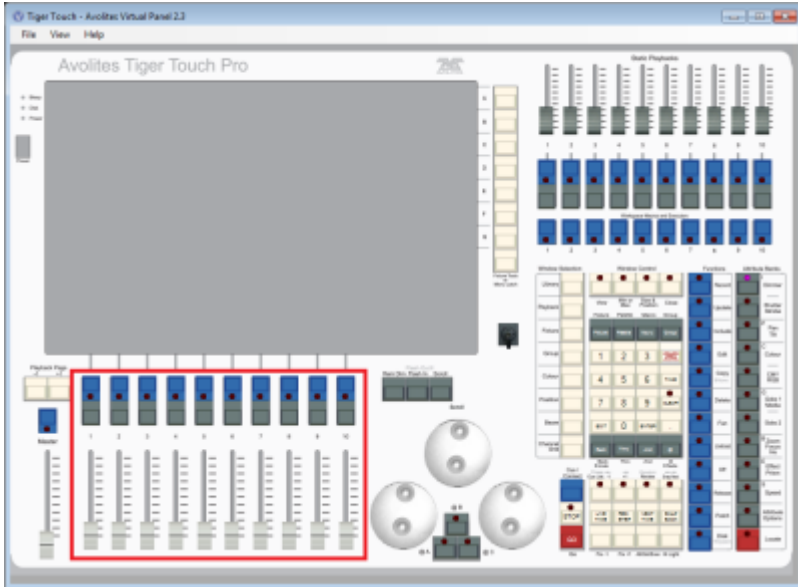

Examples for playbacks:

Arena Playbacks

Titan Mobile Playbacks

Tiger Touch Playbacks
