Namespace

Palette

Namespaces are not listed nor explained in the online API documentation. Hence, the description is merely guessed.

Seems to hold some functions and properties related to single palette handling.

Note that there is a separate namespace Palettes with more items in it.

Items in this namespace:

Properties

- Palette.CurrentPaletteHandle
- Palette.MasterFadeTime
- Palette.MasterOverlap
- Palette.StorePaletteMode

Functions

- Palette.ApplyPalette
- Palette.ApplyQuickPalette
- Palette.MergeCurrentPalette
- Palette.QuickCreatePalette
- Palette.QuickMergePalette
- Palette.StoreCurrentPaletteReplace
