

Titan Property

Audio.AudioTriggersEnabled

API	http://api.avolites.com/10.1/Audio.AudioTriggersEnabled.html
description	Gets or sets a value indicating whether all the audio triggers has to be enabled or disabled.
Namespaces	Audio
type	Boolean

example

```
<step>ActionScript.SetProperty.Boolean("Audio.AudioTriggersEnabled", true)</step>
```

This sets AudioTriggersEnabled to true, i.e. switches the Audio Triggers on.

used in

- [Trigger - Toggle Audio Triggers On/Off](#)
- [Properties list](#)
