

Titan Property

Handles.AllowEditWorkspaces

API	http://api.avolites.com/11.0/Handles.AllowEditWorkspaces.html
description	Gets or sets whether workspaces handles can be deleted, moved or copied.
Namespaces	Handles
type	Boolean

example

```
<step>ActionScript.SetProperty("Handles.AllowEditWorkspaces", true)</step>
```

By default workspaces are locked from being edited/deleted. On consoles, you have to enter the View menu in order to delete a workspace. When scripting this property needs to be set to true before deleting a workspace (and reset to false afterwards).

used in

- [Create Workspaces](#)
- [Delete Workspace X](#)
- [Handles.ConfirmDelete](#)
