

Titan Property

# Handles.ContextHandles

<b>API</b>	<a href="https://api.avolites.com/15.0/api/Handles.ContextHandles.html">https://api.avolites.com/15.0/api/Handles.ContextHandles.html</a>
<b>description</b>	the context handles for move / copy / link etc
<b>Namespaces</b>	<a href="#">Handles</a>
<b>type</b>	<a href="#">IEnumerable</a>

## example

```
<step>Handles.SetSourceHandleRange("Playbacks", {0, 1})</step>  
<step>PlaybackGroups.CreatePlaybackGroupWithPlaybacks("Test",  
Playbacks.FilterByPlaybackHandle(Handles.ContextHandles))</step>
```

In the first step some playbacks are selected as source handles (context handles) using [Handles.SetSourceHandleRange](#).

In the second step these are added to a playback group.

## used in

- [Playback Groups - Create and Add](#)
- [Handles.SetSourceHandleRange](#)
