

Titan Property

Handles.ContextHandles

API	https://api.avolites.com/15.0/api/Handles.ContextHandles.html
description	the context handles for move / copy / link etc
Namespaces	Handles
type	IEnumerable

example

```
<step>Handles.SetSourceHandleRange("Playbacks", {0, 1})</step>  
<step>PlaybackGroups.CreatePlaybackGroupWithPlaybacks("Test",  
Playbacks.FilterByPlaybackHandle(Handles.ContextHandles))</step>
```

In the first step some playbacks are selected as source handles (context handles) using [Handles.SetSourceHandleRange](#).

In the second step these are added to a playback group.

used in

- [Playback Groups - Create and Add](#)
- [Handles.SetSourceHandleRange](#)
