

Titan Property

Handles.PlaybackWindow.Page.DisplayName

ASSUMPTION

This function is not documented and simply deducted from other factory macros, and found working. Hence, this entire documentation is assumed.

Also, this is where properties and identifiers cross as identifiers of course are properties. Hence also refer to [Location](#)

API	./.
description	The legend of the page if it has been set otherwise the display index.
Namespaces	Handles.PlaybackWindow.Page
type	Int32

example

```
ActionScript.SetProperty("Playbacks.PendingLegend",  
Handles.PlaybackWindow.Page.DisplayName)
```

This sets the pending legend to the legend of the current playbackwindow page.
