Titan Property

Playbacks.PendingLegend

API	http://api.avolites.com/11.0/Playbacks.PendingLegend.html
description	Gets or sets the pending legend.
Namespaces	Playbacks
type	String

example

```
ActionScript.SetProperty("Playbacks.PendingLegend",
Handles.PlaybackWindow.Page.DisplayName)
```

This sets the pending legend to the legend of the current playbackwindow page:

> In the example the legend of the playback is also set to the name of the page it is on; not a useful thing to do but there to demonstrate what you can do.

See http://forum.avolites.com/viewtopic.php?f=20&t=5786

used in

- Store cues with current page names as legends
- Playback - Record to fixed location
