

Titan Property

System.ExternalDisplay.Enabled

API	http://api.avolites.com/11.0/System.ExternalDisplay.Enabled.html
description	Gets or sets a value indicating whether the external display enabled.
Namespaces	System.ExternalDisplay
type	Boolean

example

```
<step>ActionScript.SetProperty("System.ExternalDisplay.Enabled", true)</step>
```

Sets the display to enabled.

Additionally, `PanelManager.SetScreenState()` needs to be executed, see [System - Enable External Display \(PC-Suite only\)](#)

used in

- [System - Enable External Display \(PC-Suite only\)](#)
