

Titan Property

Windows.windowId.TextSize

API	./.
description	text size for the buttons in the window
Namespaces	Windows.windowId
type	Enum
values	"Tiny", "Small", "Normal", "Large", "VeryLarge", "Huge", "Global"

Strictly this is an element of the respective window.

windowId refers to the workspace window as explained in [Windows](#). This means there are properties like `Windows.Playbacks.TextSize`, `Windows.Colours.TextSize` and more

example

```
<step>ActionScript.SetProperty.Enum("Windows.Playbacks.TextSize",  
"Global")</step>
```

This sets the playbacks window to show the global text size.

used in

- [Attribute Wheels And Palette Windows](#)
- [Create Workspaces](#)
