Object

DmxAssignment

In Patch.CurrentDmxAssignment DmxAssignment is used as type. From the example shown it is a good assumption that something like {line}.{channel} would be parsed as DmxAssignment, e.g.

<step>Patch.SetCurrentDmxAssignment(42.1)</step>

Also used in

- Patch.Repatch.SelectDimmerAddress
- Patch.SetCurrentDmxAssignment
- Patch.CurrentDmxAssignment
