Avolites-Wiki start page

Welcome to the Avolites.de-Wiki. This site is dedicated to Avolites lighting consoles (see www.avolites.com and www.avolites.de). In particular, this is meant to be a place for custom-created content and information: there are many things not mentioned in the manuals. And as Facebook, youtube and various forums have their difficulties in making things permanently available, this wiki might be a good place.
