Titan Tricks

Installing the loopback adaptor

Sometimes it's useful to have the loopback network adaptor installed so that other programs on the same machine can control - or be controlled by - Titan. Here is how to install this:

1. Open Windows' device manager. You may do so by hitting the Windows key, and typing 'devmgmt',

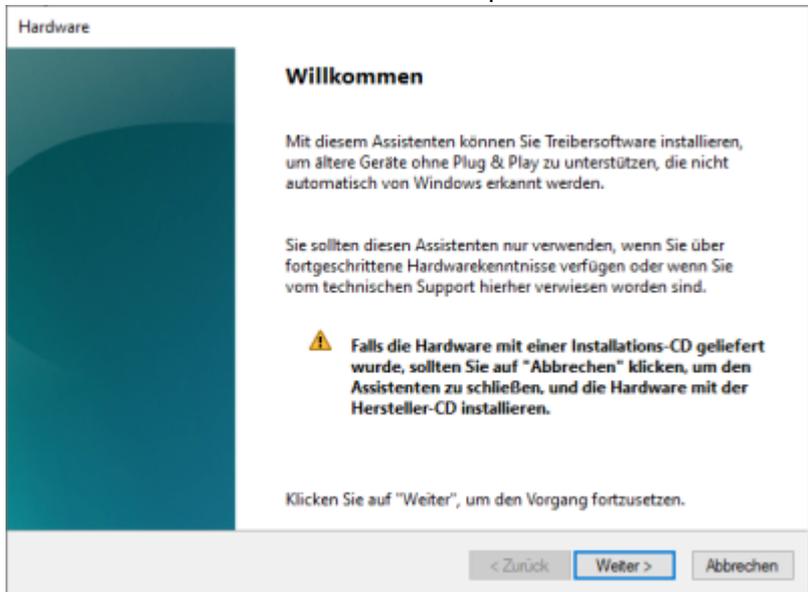

followed by `Enter`.

2. Find the network adaptor section and expand it.

3. From the `Action` menu select `Add Legacy Hardware`.
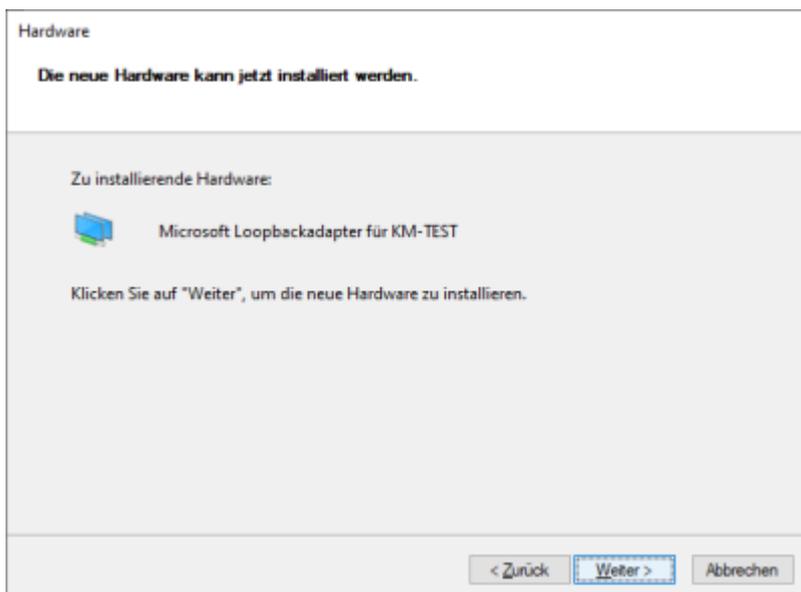

4. The 'Add New Hardware' wizard opens. Click `Next`.

5. On the next screen select `Choose hardware manually`.

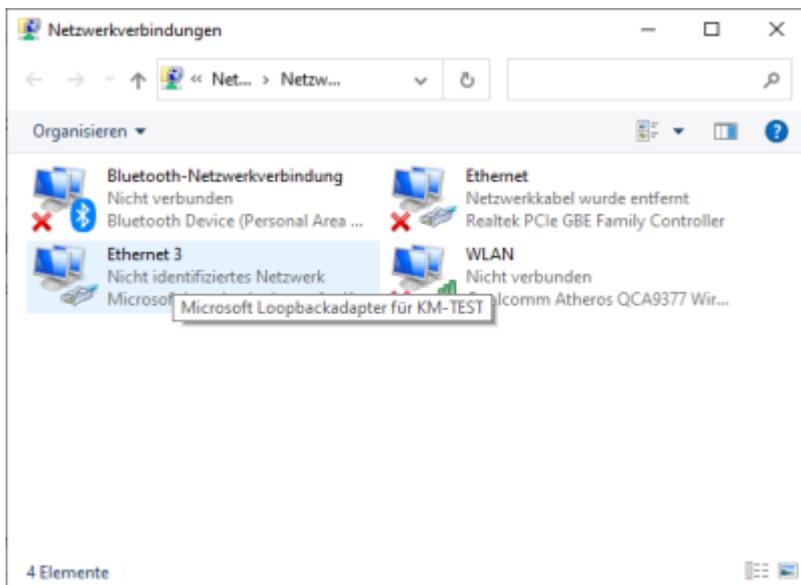

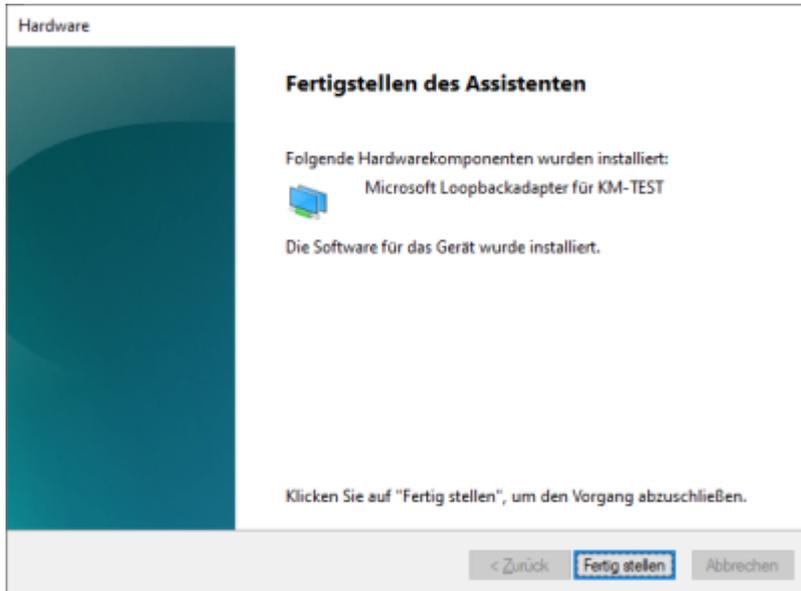

6. Select hardware type 'Network adaptors'.

7. Select manufacturer 'Microsoft' and model 'Microsoft Loopbackadaptor for KM-TEST'
